Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Frantz (4,692,175).

Frantz teaches a filter for removing liquids from a pressurized gaseous stream comprising a filter element (12) disposed in a body defining an inner chamber (10), a housing having the body disposed in an outer chamber (5), a drain device (36, 38, 39) having an orifice in the inner chamber and the outer chamber for draining the liquids from both the inner chamber and the outer chamber from the filter. Frantz further teaches the drain device comprising a spring loaded (44) ball or valve (40, 42, 45) to open or shut the orifice of the chambers (see details of Fig. 2, col. 2, lines 19-25, col. 4, line 5 through col. 5, line 25). Frantz further teaches a method of filtering liquids from a pressurized gaseous stream comprising the steps of providing a filter element (12) disposed in the inner chamber (10), housing the filter element in a housing and disposed therein an outer chamber (5), draining liquids from both the inner and outer chambers (10, 5) from the filter (12) through a drain device (36, 38, 39) through valves (40, 42, 45) (see details of Fig. 2, col. 2, lines 19-25, col. 4, line 5 through col. 5, line 25).

Response to Arguments

Applicant's arguments filed on June 9, 2005 have been fully considered but they are not persuasive.

Applicant argues that none of the cited prior arts discloses "a filter for or a method of filtering liquids from a pressurized gaseous stream comprising a filter element defining an inner chamber, a housing having an outer chamber, and a drain device having an orifice in the inner chamber and the outer chamber for draining the liquids from both the inner chamber and the outer chamber from the filter". The Examiner now drops all the cited prior arts and newly introduces Frantz as the primary reference under the 102 rejections of claims 1-20 to show a filter for removing liquids from a pressurized gaseous stream comprising a filter element (12) disposed in a body defining an inner chamber (10), a housing having the body disposed in an outer chamber (5), a drain device (36, 38, 39) having an orifice in the inner chamber and the outer chamber for draining the liquids from both the inner chamber and the outer chamber from the filter. Frantz further teaches the drain device comprising a spring loaded (44) ball or valve (40, 42, 45) to open or shut the orifice of the chambers (see details of Fig. 2, col. 2, lines 19-25, col. 4, line 5 through col. 5, line 25). Frantz further teaches a method of filtering liquids from a pressurized gaseous stream comprising the steps of providing a filter element (12) disposed in the inner chamber (10), housing the filter element in a housing and disposed therein an outer chamber (5), draining liquids from both the inner and outer chambers (10, 5) from the filter (12) through a drain device (36, 38, 39) through valves (40, 42, 45) (see details of Fig. 2, col. 2, lines 19-25, col. 4, line 5 through col. 5, line 25), as claimed.

Applicant's arguments with respect to claims 1-20 have been thoroughly considered but are most in view of the new ground(s) of rejection, as discussed above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh-Chau T. Pham whose telephone number is (571) 272-1163. The examiner can normally be reached on Mon/Tues/Thur/Fri 7:00 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
